Commercial Solar Panels

A **CLS finance lease** is the perfect way to fund commercial solar panels and battery storage.

Generate your own electricity on the roof or land you already have, and spread the cost of panels, inverters, batteries and installation over fixed monthly payments instead of one large outlay.

Consider the benefits:

- Fixed monthly payments for the length of the agreement
- Online decisions within 24 hours in most cases
- Panels, inverters, battery storage and installation
- Choose the installer you trust
- Existing credit lines remain intact
- Finance available from £1,000 with no upper limit

Businesses across the UK use CLS to spread the cost of energy projects, with one account manager guiding the application from the installer's quote to the day the system goes live.

We offer a wide range of finance solutions for your business.
